SUMMARY

Software Engineering graduate (2025) and Junior Flutter Developer with hands-on experience building scalable, mobile applications using Clean Architecture and SOLID principles. Strong expertise in BLoC and Provider state management, REST API integration, Firebase services, and local caching. Experienced in developing maintainable, modular codebases with dependency injection and repository pattern. Passionate about high-performance UI, offline-first applications, and modern mobile development best practices.

TECHNICAL SKILLS

Programming Languages: Dart, Flutter, C++, Java

State Management: BLoC, Cubit, Provider

Architecture & Patterns: Clean Architecture, MVVM, Repository Pattern, Dependency Injection (Get_it, Injectable), SOLID Principles

Networking: REST APIs, Dio, HTTP

Backend & Cloud: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging

Database & Storage: Hive (NoSQL), Shared Preferences

Tools & Practices: Git, GitHub, Postman, Android Studio, VS Code, Figma

PROJECTS

FarmLink - Agricultural Marketplace | **GitHub**

Technologies: Firebase Auth, Firestore, Riverpod, GoRouter, OpenWeather API

- Built a **full-featured marketplace** connecting farmers directly with buyers
- Implemented **real-time chat and order management system**
- Integrated **weather API & GPS location services**
- Designed **role-based experience (Farmer / Buyer)**
- Applied **Clean Architecture** for scalability

MOVIE APP | GitHub

Technologies: BLoC, Dio, Get_it, firebase, clean Arch

- Built a modular entertainment discovery application using Clean Architecture
- Implemented BLoC for scalable state management and separation of concerns.
- Integrated REST APIs using Dio with structured error handling via Either (Dartz).
- Developed dynamic movie carousels, nested scrolling views, and genre filtering.

HealthBridge – Doctor Appointment App | GitHub

Technologies: Flutter, Firebase, Google & Facebook Auth, Firestore

- Developed a **complete healthcare booking system**
- Implemented **multi-provider authentication (Email, Google, Facebook)**
- Built **appointment lifecycle (book, cancel, reschedule)**
- Designed **doctor discovery & filtering system**
- Added **notifications and health information modules**

EVENTLY – Event Management App | Github

Technologies: Flutter, Firebase Auth, Cloud Firestore, Provider, Easy Localization

- Developed a real-time event management system with full CRUD functionality.
- Implemented user authentication including Google Sign-In.
- Built multi-language support (English/Arabic) with dynamic theme switching.
- Designed a custom favorites and bookmarking system with cloud synchronization.

FLASHNEWS – News Aggregator App | GitHub

Technologies: Flutter BLoC, Hive, WebView, Api , Clean Arch

- Built an offline-first news application with local caching using Hive.
- Implemented real-time connectivity monitoring and pull-to-refresh functionality.
- Integrated WebView for full article display and deep linking.

OPEN FASHION – E-Commerce App | GitHub

Technologies: Flutter, Provider, GoRouter

- Converted complex Figma designs into responsive Flutter UI.
- Implemented custom checkout flow with credit card validation.
- Managed product navigation and state updates using Provider.

EDUCATION

Bachelor of Science in Computer and Information Sciences

Major: Software Engineering Minor: Information Sciences

Sadat Academy for Management Sciences

Graduation: June 2025
CGPA: 3.7

ADDITIONAL STRENGTHS

- Strong problem-solving and debugging skills
- Experience with scalable app architecture
- Focus on performance optimization and UX
- Fast learner with passion for modern technologies
